CLASSIFIED LISTING SECTION----- 9

LOCATION OF FIRE ALARM BOXES AND PAY TELEPHONES-----Inside Back Cover

QUICK REFERENCE LIST-----Back Cover

1. SERVICE AND SPECIAL CALLS:

AUTOVON (Class A Phone Only)	8-XXX-XXXX
Chief Telephone Operator	2242
Directory Assistance	113
Fire	117
Long Distance Toll Calls	0
Off Base	9-XXX-XXXX
Telephone Repair Service	2104
Telephone Work Orders	2322

2. HOW TO USE THE DIRECTORY:

A. The Organizational Listing Section contains an alphanumerical listing of all units served by the exchange with the host MAJCOM/BASE activity preceding other listings.

B. The Classified Listing Section contains alphabetical listings of all principle activities by a title that is recognized within the military terminology.

C. The Loring Telephone Directory is prepared and printed by the TELEMAN process. This method consists of recording each directory line entry on an IBM card which is filed in proper sequence in a card deck.

D. The card deck is processed on a recurring basis by the Directory Clerk as corrections (i.e., additions, deletions or changes) are received from the telephone users. In this way, the information contained in the directory card file is kept current, and the deck is always available for publication whenever a new edition of the directory is required.

E. Submission of Information: The published directory itself can be current only at the time of printing. Therefore, prompt submission of information by subscribers is essential. Organizations and staff agencies are requested to appoint individuals to be responsible for noting changes in their areas.

3. TIPS ON HOW TO PROMOTE GOOD TELEPHONE SERVICE:

A. When calling on base, consult the base telephone directory for the correct number, then lift the handset from the cradle and listen for the dial tone. If you do not receive a dial tone, replace the handset and try again in a few minutes. After receiving a dial tone, dial the desired number in the normal manner. Remove your finger from the dial after each number is dialed and allow the dial to return freely to it's normal position. Attempts to force or assist the dial will result in dialing a wrong number and/or damage to the telephone.

B. For speed and accuracy of service, always call by number. Always allow sufficient time for the called party to answer the telephone. Always answer your telephone promptly and identify the office and yourself.

C. All conversations with switchboard operators must be limited to requesting pertinent information and giving instructions for placing calls. Also, for economy and maximum use of available facilities, telephone conversations should be as brief as possible.

ALWAYS TRY TO FIND THE NUMBER YOU WANT BY USING THE DIRECTORY FIRST, and then if unable to locate it call the operator for assistance.

D. To recall the base operator to transfer an incoming off-base call to another base extension, slowly depress the cradle button several times. When the operator answers, furnish the extension the calling party needs to be transferred to. Under the direct dial system (AUTOVON), it is not possible for the local operator to transfer calls to another base extension. It will be necessary to initiate another call.

4. MILITARY TELEPHONE SYSTEM AND REPORTING TELEPHONE COMPLAINTS:

A. The primary objective of the Loring AFB telephone section is to furnish the best possible service to all subscribers.

B. Government leased telephones installed on Loring AFB are administratively classified in accordance with AFM 100-22:

CLASS A: Telephones authorized for the transmission of official government business only and are permitted access to off-base lines.

CLASS B: Class "B" service is not authorized on LAFB.

CLASS C: Telephones installed for the transmission of official government business and restricted to intra-base use only.

CLASS D: Telephones installed for FIRE, GUARD, AND CRASH REPORTING.

C. Caribou, Ft. Fairfield, Limestone and family housing areas may be dialed from on-base Class "A" phones by dialing 9 and the desired number. Loring AFB is served by an in-dial system, whereby an on-base extension may be dialed from Caribou, Ft. Fairfield, Limestone and also the base housing areas. To dial an on-base extension from these areas, dial 999 and the desired extension. Off-base callers may contact the base information operator by dialing 999-1110. On-base callers may contact the base information operator by dialing 113 on any Class "A" or "C" telephone.

D. Operators are thoroughly indoctrinated in the necessity of courtesy, accuracy, and speed. Adherence to the same principles by subscribers will result in better service. Operators who appear inefficient or discourteous should not be reprimanded by the telephone users. Ask the operator for his or her operator's number and report the matter with full particulars to the NCOIC at extension 2242.

5. NUISANCE CALLS:

It is a violation of State and Federal laws to make nuisance calls. It is unlawful to knowingly allow anyone to use a telephone under your control for these purposes. Listed below are some suggestions to help discourage these calls:

DO NOT DISCUSS CLASSIFIED INFORMATION ON THE TELEPHONE

A. Know to whom you are talking, ask who is calling. Ask what number the caller is trying to reach. Don't give out your name to strangers.

B. Don't talk, remember these people need an audience. Don't give them the satisfaction of listening.

C. Hang up immediately if the caller doesn't respond when you answer. Hang up at the first utterance of an obscene word, or if the person calling does not identify himself/herself to your satisfaction.

D. Do not slam the receiver down and admit to the caller that you are annoyed. Just hang up. For persistent calls, dial extension 2115 and report all facts to the SP's.

6. INFORMATION CALLS, REPORTING TELEPHONE TROUBLES AND EMERGENCY CALLS:

A. For on-base information call 113. Maine has a centralized information service for its commercial telephone system. To reach it you must dial a toll free number of 1-555-1212. For all official numbers, dial "0" for the base operator who will in turn get you the number.

B. Telephone difficulties will be reported to telephone maintenance at extension 2104. Give your extension, building number, name and a brief explanation of the problem.

C. For fire reporting dial 6666 from any phone on base. Outside fire reporting telephones are contained in red boxes and marked by a red light at night. To use, just open the box, lift handset and report fire. From a commercial phone dial 999-6666.

D. Other emergency type calls dial 113 and remain calm, explain the emergency to the operator and request assistance.

7. SECURE TELEPHONE CALLS:

A. The acronym AUTOSEVOCOM stands for automatic secure voice communications. It is a long distance telephone network used for secure communications between units and commands. It provides protection for classified and unclassified information.

B. Callers must use the AUTOSEVOCOM whenever classified information is discussed over the telephone.

C. The AUTOSEVOCOM terminal instrument is located in building 5100, the Wing Command Post. Instructions for its use should be posted beside the instrument.

D. Further guidance and information on the AUTOSEVOCOM is available at the Wing Command Post or call extension 2166.

8. TELEPHONE PRECEDENCE SYSTEM:

Reference AFM 100-22, the Joint Uniform Telephone Communications Precedence System is directed for use

by all authorized users of voice communications facilities of the Department of Defense. The assignment or use of a precedence designation based solely on rank or duty position is strictly prohibited. Since the effectiveness of the system depends upon cooperation on the part of persons authorized to employ it. Users must be familiar with the purpose to be served by each precedence level and the type of calls which may be assigned respective precedences:

A. Flash precedence is reserved for alert warnings, or other emergency actions having immediate bearing on National, Command or area security. It has precedence over any other call except a flash override.

B. Immediate has precedence over all calls except for flash and flash override.

C. Priority has precedence over only routine calls. It is reserved for calls that require prompt completion for National Defense and security, the successful conduct of war or to safeguard life or property, which do not require higher precedence. Normally, priority will be the highest precedence that may be assigned administrative matters for which speed of handling is of paramount importance.

D. Routine has no precedence over any other call and is handled sequentially as placed by calling party.

9. DESCRIPTION OF AUTOVON AND ITS USE:

A. The Automatic Voice Network (AUTOVON) telephone system is the principle long-haul voice communications network within the Department of Defense Communications System, providing unsecured direct distance dialing service worldwide through a system of government owned or leased automatic switching facilities. The purpose of AUTOVON is to handle essential command and control communications, intelligence, logistic, diplomatic, and administrative traffic.

B. The AUTOVON will be authorized for official communications only and will be restricted to:

(1) Only those calls that are essential and require a timeliness that cannot be obtained by other means, and would stand the scrutiny affordable commercial toll call.

(2) The minimum time required to accomplish the official business will not normally exceed five (5) minutes.

C. The AUTOVON will not be used nor is it authorized to be used for:

(1) Use by any nonappropriated fund activities (clubs, exchanges, or other unofficial activities) provided telephone service at post, camp, station, or base level except when approved by the Joint Chiefs of Staff.

(2) Calls within an installation, metropolitan area, or those confined geographical areas, where other existing government provided local telephone service is adequate.

(3) Unofficial or personal calls.

D. The users of the AUTOVON system should be aware that this DOD system is for official use only and is subject to management monitoring in accordance with DOD Directive 4640.1, subject, "Telephone Monitoring," dated 3 Sep 69.

E. AUTOVON users calling instructions:

(1) For routine AUTOVON calls the following procedures should be used. Verify the number, listen for dial tone, dial the AUTOVON access, code 8. After hearing a dial tone, finish dialing the 7-digit number.

(2) For other than routine calls dial "0" and give the operator the following information: your name, extension, precedence of the call, and AUTOVON number desired. If call is going overseas, provide the operator with a ten (10) digit number.

(3) AUTOVON directory assistance can be obtained by dialing for the base operator or direct dial the AUTOVON operator at 8-231-1311.

10. REQUESTING NEW TELEPHONE SERVICE:

A. Submit requests for official (Class A or C) telephone installations, relocations or removal on AF Form 1070 to 2192CS/DONL with full justification in accordance with LAFBR 100-2.

B. Rates for telephone service are contained in AFM 100-22.

C. Direct any questions pertaining to the telephone service to the work order section at extension 2322.

11. LONG DISTANCE AND TOLL FREE 800 CALLS:

A. The LAFB telephone exchange is not equipped with the direct dial (DOD) system. Therefore, all long distance calls must be placed through the local base operator.

B. To place an official collect, toll free 800, bill to 3rd party, or a credit card call from a base extension, dial "0" for the base operator. Toll free information (1-800-555-1212) may be used for directory assistance. This number can be used to obtain information on the toll free numbers of commercial customers who offer incoming long distance calls at no charge to persons calling. This service should be used before using AUTOVON or direct distance dialing. State the type of call desired and the long distance number you want.

C. Official long distance calls should be made only when the matter to be discussed requires immediate attention and toll free lines such as AUTOVON and WATTS are not available. IAW AFM 100-22, Telephone Control Officers (TCO) are appointed to control all such calls. They will determine the validity of such calls and either approve or disapprove them. When the call is approved the TCO will issue a special billing number to

the party placing the call who will then place the call through the operator.

D. When placing an official long distance call from a base telephone, dial "0" for the operator and give the following information:

- (1) Control number given by the TCO.
- (2) Your name and extension calling from.
- (3) Place being called, city and state.
- (4) Telephone number being called.

E. Limiting calls: Every effort should be made to limit calls. Do not have another person place a call for you. This procedure results in expensive holding time on the commercial trunks for which the government is being billed while you are being summoned to the telephone. Long distance calls should be limited to a maximum of five (5) minutes.

F. Foreign Exchange Lines (Porter Lines): There are two lines which are used for official calls to New Sweden, Presque Isle and Washburn areas without the use of a control number. These long distance calls should always be limited to a maximum of five (5) minutes. The prefixes of the following numbers may be reached on the Porter Lines: 455, 762, 764, 768, 769, and 896.

G. Personal Calls: All personal calls should be placed on pay telephone stations which are listed on the back of this directory. Military telephones are to be used for official use only. Personal calls over the AUTOVON system are unauthorized. Supervisors are expected to cooperate in securing strict compliance with these instructions.

12. MINIMIZE AND ITS USAGE:

A. Minimize is a condition imposed by commanders to control and reduce electrical communications. Both message and telephone traffic during exercise or periods of emergency.

B. Minimize is needed to drastically reduce non-essential message and voice traffic. The desired results are to eliminate all calls that are not pertaining to the emergency or exercise, so that other calls may be efficiently handled and not delayed by non-essential traffic.

C. Minimize will effect all local AUTOVON and long distance calls. Upon notification that a minimize is in effect, Telephone Control Officers will:

- (1) Approve only those calls considered essential which would adversely effect immediate operations if not placed or are of vital importance.
- (2) Assure assignment of the lowest precedence that will provide the necessary speed of service.

(3) Insure that all calls placed and received on telephones under their jurisdiction are official and meet minimize criteria.

(4) When minimize is in effect, telephone operators will inform all subscribers of this condition prior to completion of any call.

13. TELEFAX:

There are not any common-user TELEFAX terminals located on Loring AFB.
